

FRIENDLY PLASTIC® MARBLING COMB

The Friendly Plastic® Marbling Comb makes creating uniform swirls in Friendly Plastic® as easy as 1-2-3:

1. Cut strips of Friendly Plastic® to desired size.

2. Place strips on non-stick electric griddle or skillet preheated to 300°F until the plastic strips blend together.

3. Place teeth of comb against the strips and draw towards you in a straight or wavy pattern, allowing the cut lines to seal back together.
