*Glaze buttons fired over a pre-fired clear glaze.*

Versa Color gallons available upon request.

**NOTE:** Every effort has been made to insure that the representation of the glaze and underglaze colors shown in this catalog are accurate. Actual fired glazed ceramic chip boards are available from AMACO® for exact color matches.

**AMACO® OB-Series Versa Color —  
Lead Free**

OB-Series Versa Color are ceramic overglaze decorating colors, finely ground in an oil base. Although developed especially for silk screen printing on glazed tiles, they are a versatile medium for all glazed pottery, sculpture, china painting, and fired metal enamel surfaces. Versa Color are an excellent product for making decals.

The 8 colors may be intermixed for additional variety.

The consistency of OB-Series Versa Color makes them best suited for silk screen printing using a 200 mesh screen, however they can also be used

for stencil and free brush methods when thinned with turpentine.

Recommended firing temperature is Cone 015 with a range of Cone 016 to Cone 012. OB-Series Versa Color are semi-opaque with a brilliant sheen. The greatest contrast is obtained when applied on a white glazed background. Less color contrast but interesting results are obtained on colored clays and glazes. When applied over matte glazes or on vitrified bisque, they have a matte texture.

*DO NOT use Versa Color on dinnerware surfaces.*

**OB-Series Versa Color — Lead Free**
