

CELEBRATION (HF) HIGH FIRE GLAZES

GLAZES

AMACO® Celebration High Fire Glazes — Lead Free

Cone 5. AMACO® Celebration Glazes are a beautiful group of bright and pastel colors for stoneware that are as colorful as earthenware glazes. These glazes are opaque and can be applied over AMACO® 65M, 48M, 27M, 77M, and 58M clays. Bisque fire the clay to Cone 04, then glaze and fire to maturing temperature at Cone 5. The final surface appearance will change depending on the clay body on which they are applied. These glazes are great

when used in contrasting colors, next to or on top of each other. Furthermore, excellent results have been achieved when used over the Sahara or Potter's Choice series glazes. Therefore, don't restrict yourself to the 18 colors in this series. Experiment with them in different combinations and increase your choice of color and texture. These glazes are great to produce colorful utilitarian ware.

NON-TOXIC
Conforms to
ASTM D-4236
